About Me

I'm a self-taught front-end developer who loves creation and teamwork to expand his knowledge & experience. For the past four years, I have been improving my skills in programming. Now, I have a strong ability to create beautiful, responsive designs and a solid understanding of JavaScript principles. I am skilled in React and TypeScript, and I also have experience working with back-end technologies like Node.js and Express.

Education

BS	[Shahid Rajaee Teacher Training University ⧉](#)	since January 2021
HS	**Daneshmand governmental leading high school**, Mathematics	Sept 2017 – June 2020

Programming skills

Languages

HTML   CSS   JavaScript   TypeScript   PHP

Front-End Technologies

Nextjs   React   Tailwind / Bootstrap   SASS / SCSS   Zustand / Redux-tlk   Swiper.js / OwlCarousel / skelleton

Back-End & API Technologies

Node.js / Express   MongoDB / Mongoose   REST / Axios / Fetch   JWT / Passport / Express-validator   Multer

Tools

Git / Github   Postman   Adobe XD / Illustrator / Photoshop   Wordpress

Soft skills

Teamwork

- Collaborating with designers & developers
- Working well in cross-functional teams

Problem-Solving

- Debugging efficiently
- Approaching challenges creatively

Attention to detail

- Writing clean, maintainable code
- Ensuring UI consistency

Projects

Portfolio

see on Github ⧉
aminderakhshande.ir ⧉

- Welcome to my online portfolio, where you can learn about me, see my work, and connect with me. A fully responsive page featuring dark and light theme options.
- Tools used: Nextjs , Express , Typescript , Javascript , Tailwind , Zustand

Venzo, mobile online shop   see on Github ↗

- "Venzo is an online store for mobile phones and accessories. It was my first MERN stack project, where I built a RESTful API and gained experience working with MongoDB. The project includes JWT authentication, admin panel,protected routes, and CRUD operations for categories, users, products, and articles. Additionally, I implemented product addition to the shopping cart and integrated ZarinPal as the payment gateway."
- Tools used: React+TS , Nodejs , Express , MongoDB , Tailwind , Zustand , Vite

Tapesh, book your doctor's appointment easily!   see on Github ↗
                                                                             see demo on gh-pages ↗

- A beautifully designed and fully responsive React application that allows users to book doctor appointments online seamlessly.
- Tools used: React+js , Bootstrap , react-router-dom , Context , CRA

Elecrun, world of electric cars   see on Github ↗

- A specialized website for reviews, guidance, and troubleshooting of electric vehicles, featuring a beautiful, responsive design inspired by Vigiato. Key features include article search functionality, an image gallery, and advertisement display.
- Tools used: React+js , Bootstrap , react-router-dom , Context , CRA

Flow human, free land of education and development   see on Github ↗
                                                                             see demo on gh-pages ↗

- Flow Human is an educational website designed for students of Shahid Rajaee University in Tehran. This project is currently in its initial prototype phase, with a strong focus on fully responsive design principles."
- Tools used: HTML , CSS , Javascript

Digikala, just like old times   see on Github ↗
                                                                             see demo on gh-pages ↗

- Digikala is a responsive e-commerce website featuring a mega menu, beautifully designed sliders, an article archive, and a landing page as key functionalities.
- Tools used: HTML , CSS , Javascript
